

Erich Jeremiah Paul A. Gagui

Maugat Tanauan City, Batangas · 09911772866 · erichjeremiahpaula.gagui@gmail.com

CAREER OBJECTIVE

To grow into a backend and full-stack engineering role where schema design, clean API architecture, and reliable deployment pipelines are core to the job, while continuing to build and ship independent projects across web, mobile, and game development.

EDUCATION

University of Batangas Lipa Campus | 2023 - Present

Bachelor of Science in Information Technology
Lipa City, Batangas

Tanauan City Integrated High School | 2021 - 2023

Science, Technology, Engineering and Mathematics
Trapiche 1, Tanauan City, Batangas

Tanauan School of Fisheries | 2017 - 2021

Secondary Education
Ambulong, Tanauan City, Batangas

Ambulong Elementary School | 2014 - 2017

Primary Education
Ambulong, Tanauan City, Batangas

Adonai-King of Glory Christian School | 2012 - 2014

Primary Education
Quiling, Talisay, Batangas

Green Gables Academy | 2009 - 2012

Primary Education
Greenpark Village, Cainta, Rizal

TECHNICAL SKILLS

Backend	PHP (MVC), Visual Basic .NET
Database	MySQL, MyISAM, Schema Design, SQL
Web / Frontend	Vue.js, JavaScript, HTML5, CSS3
Mobile	Android (Java / Kotlin), Jetpack Navigation
Desktop	Java, Java Swing, Maven, NetBeans
Game Dev	Unity (2D & 3D), C#, URP
Tooling / Deploy	Git, GitHub, Node.js, Firebase, Render, XAMPP, VS Code

PERSONAL DATA

- Age: 21
- Citizenship: Filipino
- Gender: Male
- Civil Status: Single

INTERESTS

- Backend architecture and relational database design across different project types.
- Exploring new frameworks and deployment platforms, from mobile and desktop stacks to cloud hosting.

SKILLS

- Database Schema Design and Data Integrity
- Debugging and QA (routing bugs, seed-data errors, cross-output verification)
- Multi-Platform Development (Web, Mobile, Desktop, Game)
- Version Control and Structured Documentation (Git, CHANGELOG-driven delivery)
- Fast Learner (New Frameworks & Deployment Tools)
- Languages: Fluent in English and Filipino

CAREER GOALS

To grow into a backend or full-stack developer role focused on database design and data integrity, building on hands-on experience across Web Development, PHP, and Java, while continuing to expand into new deployment platforms.
